HUTCHISON PORTS ICAVE ELEVATES TERMINAL EFFICIENCY

Summer 2025 / Spotlight / Sustainability / Smart Tech
Business Unit: HUTCHISON PORTS ICAVE

Hutchison Ports ICAVE has taken a bold step towards terminal modernisation and environmental leadership acquiring a new Super-Post-Panamax quay crane at the Port of Veracruz.

Unveiled on 18 May, the electric-powered automated crane boasts a 68-metre outreach, capable of handling vessels up to 24 containers wide will enhance terminal efficiency, improve operational safety and reduce carbon emission.

The modernisation of equipment is part of Hutchison Ports' wider net-zero target and strategy, aiming for a 54.6 percent reduction in Scope 1 and 2 GHG emissions by 2033 and a full value chain net-zero by 2050. The new crane will join three existing cranes of similar capacity, positioning ICAVE as one of the most advanced and sustainable terminals in Mexico.

Looking ahead, ICAVE will continue its green transformation with the addition of eco-friendly technology and equipment, reaffirming its role in driving smart tech adoption across the maritime sector and its sustainability strategy.

Arrival of Super-Post-Panamax quay crane at the Port of Veracruz.
