## SMART GREEN INVESTMENTS AT HUTCHISON PORTS PAKISTAN

Summer 2024 / Sustainability / Smart Tech  
Business Unit: HUTCHISON PORTS PAKISTAN

Hutchison Ports Pakistan has invested in new eco-friendly equipment and technology to improve efficiency at its Karachi terminal, including 31 Rubber-Tyred Gantry Cranes (RTGCs), comprise of hybrid and electric powered models, and 22 automated RTGCs.

"We are conducting our quayside operations entirely through a remote operating centre to our yard and berth cranes, with an emphasis on environmentally friendly cranes," stated CS Kim, Head of the Business Unit of Hutchison Ports Pakistan.

"This technological upgrade has significantly enhanced the port's efficiency. Our quay cranes can handle 25 moves per hour and have achieved a record of 44 moves per hour," said Muhammad Hamza Masood, Senior Operations Manager of Hutchison Ports Pakistan.

"With the assistance of the latest technology, coupled with an advanced Terminal Operating System (nGen), our terminal operators can comfortably work in an office environment while ensuring productivity," he added.
