HUTCHISON PORTS IS FIRST SBTI APPROVED GLOBAL PORT OPERATOR

Summer 2024 / Spotlight / Sustainability
Business Unit: HUTCHISON PORTS (HEADQUARTERS)

Hutchison Ports is the first global port operator to receive official approval from Science Based Targets initiative (SBTi) for both the near-term greenhouse gas (GHG) emission reduction target and net-zero target, showcasing a pivotal achievement in its active response to global climate challenges.

The company has pledged to achieve a 54.6 percent reduction in scope 1 and 2 emissions as well as a 32.5 percent reduction in scope 3 emissions by 2033 from a 2021 base year and aims to achieve net-zero emissions by 2050 or earlier.

AMBITION AND DEDICATION

This ambitious goal aligns with the latest climate science and the trajectory to limit global warming to 1.5°C above pre-industrial levels, mitigating the risks of climate change. The approval by SBTi is a testament to Hutchison Ports' dedication to sustainable development and environmental stewardship.

Hutchison Ports has taken a proactive approach to setting science-based targets (SBTs) to reduce GHG emissions. It is a comprehensive and collaborative effort that involves meticulous planning, stakeholder engagement, and a commitment to continuous improvement. The journey towards setting SBTs at Hutchison Ports began with a comprehensive assessment of its carbon footprint across the group in scope 1, scope 2 and scope 3 emissions.

STRATEGIC GOALS

To ensure that Hutchison Ports progresses continuously towards the near-term and net-zero targets, the company has implemented various strategies, focusing on innovation, collaboration, and continuous improvement across its operations. Here are some of the key strategies:

Future Equipment Electrification: The company is transitioning to electric equipment and vehicles, reducing reliance on fossil fuels. This includes the adoption of electric cranes, trucks, and other port machinery.

Renewable Energy Adoption: Hutchison Ports is investing in renewable energy sources, both onsite and offsite, such as hydrogen, solar and wind power, to supply clean energy for its operations.

Scope 3 Emissions Management: Recognising the significance of indirect emissions, the company actively identifies and addresses emissions along its value chain from sources like procurement of equipment and transportation.

Governance and Risk Management: Hutchison Ports has integrated climate-related considerations into its governance structures and risk management processes. This ensures that climate risks are adequately assessed and managed, and sustainability goals are incorporated into decision-making.

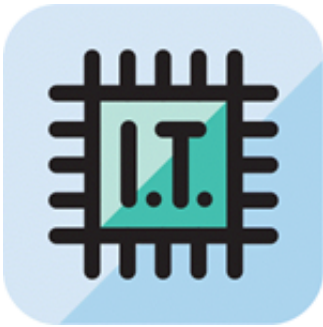

Emissions Tracking and Monitoring: Hutchison Ports has deployed a cloud-based environmental information system to collect and monitor environmental data. Automatic data validation is performed on every data point submitted in the system. Hutchison Ports has deployed a cloud-based environmental information system to collect and monitor

environmental data. Automatic data validation is performed on every data point submitted in the system.

Collaboration with Stakeholders: The company is working closely with shipping line customers, port authorities, suppliers and other stakeholders to collectively reduce emissions. This includes sharing best practices and encouraging the adoption of low-carbon technologies.

Innovation and Technology: The company is exploring and implementing cutting-edge technologies to improve efficiency and reduce emissions. This includes advancements in automation, data analytics, and alternative fuels.

Employee Engagement and Training: Hutchison Ports is fostering a culture of sustainability by engaging employees in its environmental initiatives and providing training on sustainable practices.

Transparent Reporting: The company is committed to transparent reporting on its progress towards SBTs. This includes regular publication of sustainability reports and communications with stakeholders.

The approved targets are subject to reassessment and revalidation every 5 years by SBTi.

Hutchison Ports is dedicated to building resilience through sustainable development and positions it as a leader in environmental sustainability within the maritime industry.
