25TH ANNIVERSARY OF HUTCHISON PORTS TIMSA

Winter 2024 / Snapshot

Business Unit: HUTCHISON PORTS TIMSA

Innovation, transparency and improvement are the key elements that are associated with Hutchison Ports TIMSA throughout its 25-year history, located at the Port of Manzanillo, in Mexico. These core values for many years have guided the actions of staff and stakeholders who have helped to drive TIMSA to new heights.

In commemorating its 25th anniversary, TIMSA celebrates many historical achievements since its inception in 1999. The port continues to develop into an important trading hub on the Pacific Ocean coast, facilitating trade between Asia and the Americas. According to the Administration of the National Port System of Manzanillo (ASIPONA), in the first eight months of 2024, the port has handled more than 2.6 million TEU, reflecting an increase of 8.5 percent compared to the previous year, which reaffirms its leadership with a 45 percent share in the national cargo market. The company's dedication and unwavering commitment to operational excellence and sustainability, creates an exciting future for growth and business opportunities bringing more foreign investors and businesses to the region.

TIMSA CELEBRATES EVERYWHERE

To mark the special occasion, a celebration ceremony was held in July for employees, shareholders, business partners and customers. Several colourful sculptures of traditional Mexican dogs called 'Tlanchichis' (meaning 'Earth Dog'), also known as 'Colimotes Dancing Dogs' were specially created by professional artists for display at the Port of Manzanillo.

The sculpture symbolises the transmission of wisdom from an old dog to a young one, showing a connection between the past and present. These symbolic sculptures were displayed in different locations throughout the city, such as the airport, city downtown and at TIMSA offices. A commemorative photo booth was also placed in Manzanillo's city centre, inviting the community and tourists to be part of TIMSA's 25th anniversary celebration.
