SUPER GREEN IS HERE

Winter 2025 / Sustainability
Business Unit: HUTCHISON PORTS

Hutchison Ports is set to advance its Go Beyond Go Green initiative in 2026 with the introduction of the 'Energy Saving Starts at Home' campaign and the launch of the Go Green Energy Saver mascot, Super Green.
This campaign encourages employees and members of the community to adopt energy-efficient practices, supporting the achievement of Sustainable Development Goals (SDGs) 7 and 12 by collectively working to reduce our carbon footprint.

From Hutchison Ports' perspective, sustainability extends beyond meeting quantitative targets. The organisation seeks to inspire and educate community stakeholders, including staff and students, to actively engage in energy-saving initiatives and contribute to environmental protection. Most importantly, it aims to foster a culture of care and commitment throughout the community.

Join us to learn more practical energy-saving techniques with Super Green.
