Sep 2025

HUTCHISON PORTS ACHIEVES REMARKABLE EMISSION REDUCTION

Winter 2025 / Sustainability
Business Unit: HUTCHISON PORTS

Hutchison Ports achieved an 8.5 percent reduction in carbon intensity, reaching 9.72 kg CO□e per TEU and falling below the 10 kg CO□e per TEU threshold for the first time. Diesel consumption per TEU also decreased by 7.4 percent compared to 2024, attributed to the ongoing equipment electrification programme, increased utilisation of renewable energy, and improved operational efficiency. The group remains firmly committed to attaining the SBTi Net-Zero target by 2050 and continues to prioritise additional emissions reductions.

Environmental KPIs	Unit	FY 2024	Jan-Oct 24	Jan-Oct 25
Diesel Consumption per TEU	Litre / TEU	2.57	2.58	2.39
Carbon Intensity	kg CO_2e/TEU	10.62	10.62	9.72

Environmental KPIs	Diesel Consumption per TEU	Carbon Intensity
Unit	Litre / TEU	kg CO_2e/TEU
FY 2024	2.57	10.62
Jan-Oct 24	2.58	10.62
Jan-Oct 25	2.39	9.72
